

Save Money, Save Energy

Who: Federal Energy and Facility Managers and Procurement Officers
What: Energy Financial Incentives and Procurement Programs Workshop
When: Tuesday, March 27, 2007
Where: U.S. Customs House, 1 Bowling Green, New York City

Did you know that New Jersey and New York State have financial incentives available for energy projects for facilities just like yours that will help you save money and energy? The combined available funding totals more than \$300 million per year.

The New York State Energy Research and Development Authority (NYSERDA), New Jersey Board of Public Utilities (NJBPUB), Long Island Power Authority (LIPA), U.S. Department of Energy Federal Energy Management Program (FEMP), and U.S. General Services Administration (GSA) have teamed up to present an Energy Financial Incentives and Procurement Programs Workshop on Tuesday, March 27, 2007.

Learn how to obtain these incentives by choosing the most appropriate avenue for funding and implementation. State and Federal experts from New York and New Jersey will discuss financial assistance to implement energy-efficiency projects, load management, distributed generation, and much more.

Please visit <http://fempcentral.com/workshops/registration.ws> for registration and additional information. Space is limited, so for security purposes, and to ensure a lunch, you must preregister for this no-cost training.

If you have additional questions, please contact Brian Magden, Regional Energy Coordinator, at 212-264-0591 or brian.magden@gsa.gov

AGENDA
